RE: Letter of Recommendation for Miles Possing

Dear Hiring Manager,

It is with great pleasure that I may recommend Miles Possing for any position in the field of software engineering, general computer programming, or acoustical systems development.

Miles Possing has played an important role in the Riverbank Acoustical Laboratories (RAL) technical operations for several years. Initially, he contributed 145 hours to a summer internship during the period of May 27, 2014 to July 23 2014. During this time, Miles demonstrated proficiency in updating the code of our aging test interface software, programmed in VB 6.0. During this internship, he developed a system for the input of traceable instrument serial numbers and calibration dates such that they could be automatically downloaded to the test report document templates.

In May of 2016, RAL hired Miles Possing as a full time Acoustical Test Engineer. Miles successfully performed acoustical testing procedures and engineering investigations for many different customers during this time. On December 01 of 2017, Miles moved to Seattle to pursue education in computer science. He continued to support RAL part time through the development of new test interface programmed in C#, which would operate our new Bruel & Kjaer analyzers and replace our legacy systems. Miles led the development and engineering of this software himself and wrote all of the code from the ground up. We are very excited to have fully installed, stable, and independently validated test software as of September 2018. The entire team is thrilled to be using the system and we hope to gain many years of service from it.

I know Miles Possing to be a person of exceptional intelligence and perseverance. He is a rare find and will bring great value to any organization that employs him in the future. Miles is someone you can trust to take on the hard technical problems.

Miles Possing will be a great asset to your team.

Please feel free to contact me if you have questions or require further clarification.

Sincerely,

Eric Wolfram
Laboratory Manager
Riverbank Acoustical Laboratories™
